

I am really concerned with LPFM stations taking priority over current FM translator services like K-LOVE. I listen to K-LOVE everyday and am pleased to be a financial contributor. K-LOVE is a positive and encouraging force in my life and the lives of my friends and family. It is uplifting and motivating for people in the community that need help or are hurting. K-LOVE is one of the few radio stations left in my community that is family friendly and supportive to the community. I can't imagine my life without being able to listen to K-LOVE in the morning, at work and in my car. This radio station has had such a profound impact on myself, this community and the nation. It would be awful to see this incredible radio network being replaced by another trashy secular radio station that doesn't do any good for the community.
